## ROLLER BEARING-MOUNTED CLIPPER TRIMMER

The invention and development of a clipper trimmer mounted on roller bearings has meant a giant leap forward in terms of rationalisation in the brush manufacturing industry. Our use of cutting-edge technologies has allowed us to successfully launch the production of this unique tool. We now want to share this innovation with you so that you, as a renowned brush manufacturer, can use the newly developed clipper trimmer in innovative and forward-looking ways.

We can bring state-of-the-art clipper trimmer technology to all customers for automating brush manufacturing and implementing new projects.

Our service offering based on our low-maintenance clipper trimmer technology comprises all services relating to the planning and development of brush cutting tools in various sizes and designs, including servicing, assembly and repair. The services we provide are always perfectly tailored to the individual needs and specifications of the customer.

One renowned brush manufacturer put our clipper trimmers through rigorous endurance tests, which they successfully passed. Since then, the tool has been further developed and refined, and has already far exceeded all expectations. Now, we want to become the no. 1 innovation partner of clipper trimmer technology for all companies in the brush manufacturing industry.

### KEY FEATURES

- Zero-clearance linear bearing
- No direct mechanical contact between blades
- No wear at idle
- No heat generation – meaning no blade distortion
- Consistently high cutting quality
- Extremely smooth-running
- Suitable for high speeds and long strokes
- Virtually maintenance-free
- No set-up required
- Multiple resharpener possible
- Very high durability and a significantly longer service life

### ADJUSTABLE PROTECTIVE PLATES ARE DELIVERED AS STANDARD

- To protect the operator
- To protect the blades against external hazards
- With entrance radius for setting/guiding fibres

### APPLICATION-SPECIFIC

- 100 mm + tothing
- 150 mm + tothing
- 200 mm + tothing

We can also produce customised tothings on request. Just ask! We can also provide larger, longer clipper trimmers as required.
